

REMOTE ACTIVATION DEVICES

iControls now stocks a reliable line of Remote Activation Devices to work with the Pulse Direct Drive DC Operators.

TRANSMITTER (PART # TXTA-200)

- Three Button Transmitter - Can be programmed to operate with up to 3 different receivers to operate up to 3 doors, or for Open, Close and/or Stop functions
- 315MHz - works with RXTA-100, or as replacement unit for other LM receivers with the same frequency.
- Provided with visor clip for Forklifts and Trucks.
- FCC Approved.

RECEIVER (PART # RXTA-100)

- 2 Channel Receiver - Can be programmed to operate 1 or 2 doors, or for Open/Close or Open/Stop functions.
- Universally Adaptable - Works with most available brands/models of transmitters (300-390MHz) including those with rolling code.
- 9-30Vac/dc Input.
- FCC Approved.

WIRELESS BATTERYLESS PULL CORD TRANSMITTER (PART # RPTX-100)

- Pull Cord Switch needs no wiring or battery, mounted via suspension or screw.
- Communicates only with Harmony Receiver, connectable to Pulse 500.
- FCC Approved.

HARMONY RECEIVER FOR RPTX-100 (PART # RPRX-100)

- 24-240Vac/dc
- FCC Approved
